Section 4. First Aid Measures

Eye Contact
Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Get medical attention.

Skin Contact
In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

Serious Skin Contact
Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek medical attention.

Inhalation
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

Serious Inhalation
Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

Ingestion
Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention if symptoms appear.

Serious Ingestion
Not available.

Section 5. Fire and Explosion Data

Flammability of the Product
Flammable.

Auto-Ignition Temperature
363°C (685.4°F)

FlashPoints
CLOSED CUP: 12.73°C (55°F). OPEN CUP: 17.78°C (64°F) (Cleveland).

Flammable Limits
LOWER: 3.3% UPPER: 19%

Products of Combustion
These products are carbon oxides (CO, CO2).

Fire Hazards in Presence of Various Substances

Explosion Hazards in Presence of Various Substances
Risks of explosion of the product in presence of mechanical impact: Not available. Slightly explosive in presence of open flames and sparks, cf heat, of oxidizing materials, of acids.

Fire Fighting Media and Instructions
Flammable liquid, soluble or dispersed in water.
SMALL FIRE: Use DRY chemical powder.
LARGE FIRE: Use alcohol foam, water spray or fog.

Special Remarks on Fire Hazards
Containers should be grounded. CAUTION: MAY BURN WITH NEAR INVISIBLE FLAME. Vapor may travel considerable distance to source of ignition and flash back. May form explosive mixtures with air. Contact with Bromine pentafluoride is likely to cause fire or explosion. Ethanol ignites on contact with chromyl chloride. Ethanol ignites on contact with iodine heptfluoride gas. It ignites than explodes upon contact with nitrosyl perchlorate. Addition of platinum black catalyst caused ignition.

Special Remarks on Explosion Hazards
Ethanol has an explosive reaction with the oxidized coating around potassium metal. Ethanol ignites and then explodes on contact with acetic anhydride + sodium hydrosulfate (ignites and may explode), disulfuric acid + nitric acid, phosphorus(III) oxide platinum, potassium tert-butoxide + acids.
Ethanol forms explosive products in reaction with the following: compound: ammonia + silver nitrate (forms silver nitride and silver fulminate), iodine + phosphorus (forms oxide), nitrile perchlorate (forms ethyl perchlorate), mercuric nitrate, nitric acid + silver (forms silver fulminate) silver nitrate (forms ethyl nitrate) silver(I) oxide + ammonia or hydrazine (forms silver nitride and silver fulminate), sodium (evolves hydrogen gas). Sodium Hydrazide + alcohol can produce an explosion. Alcohol should not be mixed with mercuric nitrate, as explosive mercuric fulminate may be formed. May form explosive mixture with manganese perchlorate + 2,2-dimethoxypropane. Addition of alcohols to highly concentrate hydrogen peroxide forms powerful explosives.

Section 6. Accidental Release Measures

Small Spill
Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.

Large Spill
Flammable liquid.
Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

Section 7. Handling and Storage

Precautions
Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, acids, alkalis, moisture.

Storage
Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Store at ambient (room) temperatures (15 - 30 deg. C). Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame). Sensitive to light. Store in light-resistant containers.

Section 8. Exposure Controls/Personal Protection

Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

Personal Protection
Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves. Use a respirator if the exposure limit is exceeded.

Personal Protection in Case of a Large Spill
Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits
TWA: 1900 (mg/m³) from OSHA (PEL) [United States]
TWA: 1000 (ppm) from OSHA (PEL) [United States]
TWA: 1900 (mg/m³) from NIOSH [United States]
TWA: 1000 (ppm) from NIOSH [United States]
TWA: 1000 (ppm) [United Kingdom (UK)]
TWA: 1920 (mg/m³) [United Kingdom (UK)]
TWA: 1000 STEL: 1250 (ppm) [Canada]

Consult local authorities for acceptable exposure limits.

Section 9. Physical and Chemical Properties

Physical state and appearance Liquid. (Liquid.)

Molecular Weight 46.07 g/mole

pH (1% soln/water) Not available.

Boiling Point 78.5°C (173.3°F)

Melting Point -114.1°C (-173.4°F)

Critical Temperature 243°C (469.4°F)

Specific Gravity 0.789 (Water = 1)

Vapor Pressure 5.7 kPa (@ 20°C)

Odor Mild to strong, rather pleasant; like wine or whiskey. Alcohol-like; ethereal, vinous.

Taste Pungent. Burning.

Color Colorless. Clear

<td>Corrosivity</td>
<td>Non-corrosive in presence of glass.</td>
</tr>
</tbody>
</table>

**Special Remarks on Reactivity**

Ethanol rapidly absorbs moisture from the air. Can react vigorously with oxidizers. The following oxidants have been demonstrated to undergo vigorous/explosive reaction with ethanol: barium peroxide, bromine pentafluoride, calcium hypochlorite, chlorate, chloryl perchlorate, chromium trioxide, chromyl chloride, dioxygen difluoride, disulfuryl difluoride, fluorine nitrate, hydrogen peroxide, iodine heptfluoride, nitric acid, nitrosoyl perchlorate, perchloric acid, permanganic acid, peroxodisulfuric acid, potassium dichromate, potassium perchlorate, potassium permanganate, ruthenium(VIII) oxide, silver perchlorate, silver peroxide, uranium hexafluoride, uranyl perchlorate, chlorine.

Ethanol can react vigorously/explosively with the following: acetyl bromide (volves hydrogen bromide), acetyl chloride, aluminum sesquibromide ethylate, ammonia + silver nitrate (forms silver nitride and silver fulminate), isocyanates, halogens, hydrazine, caustics (ammonia, ammonium hydroxide, calcium hydroxide, potassium hydroxide, sodium hydroxide), acid anhydrides, ammonium or hydrazine + silver (I) oxide, chlorate, chromic anhydride, cyanuric acid + water, dichloromethane + sulfuric acid + nitrate (or) nitrite, hydrogen peroxide + sulfuric acid, iodine + phosphorus (forms ethane iodide), iodine + methanol + mercuric oxide, magnesium perchlorate (forms ethyl perchlorate), manganese perchlorate + 2,2-dimethoxy propane, perchlorates, chromates, permanganates + sulfuric acid, potassium superoxide, potassium tert-butoxide, silver + nitric acid (forms silver fulminate), silver nitrate (forms ethyl nitrate), sodium hydrazide, sulfuric acid + sodium dichromate, tetrahydrofuran + water, mercuric nitrate, acetic anhydride + sodium hydrosulfate, disulfuric acid + nitric acid, phosphorous (III) oxide, potassium tert-butoxide + acids, alkali metals (liberates flammable hydrogen gas).

Ethanol is also incompatible with platinum, and sodium (liberates flammable hydrogen gas). No really safe conditions exist under which ethyl alcohol and chlorine oxides can be handled. Reacts vigorously with acetyl chloride. It can react with freshly cut/etched/scratched aluminum (evolution of heat and release hydrogen gas). The Ethyl alcohol has to be on the aluminum surface as it is being cut/etched/scratched.

**Special Remarks on Corrosivity**

Not available.

**Polymerization**

Will not occur.

---

## Section 11. Toxicological Information

**Routes of Entry**

Absorbed through skin. Dermal contact. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals**

**WARNING:** THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE.

Acute oral toxicity (LD50): 3450 mg/kg [Mouse].

Acute toxicity of the vapor (LC50): 39000 mg/m² 4 hours [Mouse].

**Chronic Effects on Humans**

*Continued on Next Page*
**Ethyl alcohol 200 Proof**

### CARCINOGENIC EFFECTS
Classified 1 (Proven for human.) by IARC (For Ethyl alcohol in alcoholic beverages). A4 (Not classifiable for human or animal.) by ACGIH.

### MUTAGENIC EFFECTS
Mutagenic for bacteria and/or yeast.

### TERATOGENIC EFFECTS
Classified PROVEN for human.

### DEVELOPMENTAL TOXICITY
Classified Developmental toxin [PROVEN]. Classified Reproductive system/toxin/female. Reproductive system/toxin/male [POSSIBLE].

Causes damage to the following organs: blood, liver, central nervous system (CNS). May cause damage to the following organs: kidneys, the reproductive system, heart, skin.

### Other Toxic Effects on Humans
Hazardous in case of skin contact (irritant), of inhalation. Slightly hazardous in case of skin contact (permeator), of ingestion.

#### Special Remarks on Toxicity to Animals
- **LDL[Human]** - Route: Oral; Dose: 1400 mg/kg
- **LDL[Human child]** - Route: Oral; Dose: 2000 mg/kg
- **LDL[Reabbit]** - Route: Skin; Dose: 20000 mg/kg

#### Special Remarks on Chronic Effects on Humans
May affect genetic material (mutagenic)

Causes adverse reproductive effects and birth defects (teratogenic), based on moderate to heavy consumption.

May cause cancer based on animal data.

**Human:** passes through the placenta, excreted in maternal milk.

#### Special Remarks on other Toxic Effects on Humans
Acute potential health effects:

- **Skin:** causes skin irritation
- **Eyes:** causes eye irritation

**Ingestion:** May cause gastrointestinal tract irritation with nausea, vomiting, diarrhea, and alterations in gastric secretions. May affect behavior/central nervous system (central nervous system depression - amnesia, headache, muscular incoordination, excitement, mild euphoria, slurred speech, drowsiness, staggering gait, fatigue, changes in mood/personality, excessive talking, dizziness, ataxia, convulsions, somnolence, coma/narcosis, hallucinations, distorted perceptions, general anesthetic), peripheral nervous system (spastic paralysis)vision (diplopia). Moderately toxic and narcotic in high concentrations. May also affect metabolism (anorexia), blood (changes in serum composition), liver (fatty liver degeneration, hepatocellular necrosis), respiration (dyspnea), and endocrine system.

May affect respiratory tract, cardiovascular (cardiac arrhythmias, hypotension), and urinary system. Kidneys - interstitial nephritis.

**Inhalation:** May cause irritation of the respiratory tract and affect behavior/central nervous system with symptoms similar to ingestion.

**Chronic Potential Health Effects:**

- **Skin:** Prolonged or repeated skin contact may cause dermatitis, an allergic reaction.

**Ingestion:** Prolonged or repeated ingestion will have similar effects as acute ingestion. It may also affect the brain, metabolism (weight loss).

### Section 12. Ecological Information

#### Ecotoxicity
Ecotoxicity in water (LC50): 14000 mg/l 96 hours [Fish (Rainbow trout (Oncorhynchus mykiss))]. 11200 mg/l 24 hours [Fish (fingerling trout)]. 13400-15100 mg/l 96 hours [Fish (Fathead minnow (Pimephales promelas))].

#### BOD5 and COD
Not available.

#### Products of Biodegradation
Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

#### Toxicity of the Products of Biodegradation
The product itself and its products of degradation are not toxic.

#### Special Remarks on the Products of Biodegradation
Not available.

### Section 13. Disposal Considerations

#### Waste Disposal
Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Section 14. Transport Information

DOT Classification
CLASS 3: Flammable liquid.

Identification
UNNA: 1170 : Ethanol   PG: II

Special Provisions for Transport
Not available.

Section 15. Other Regulatory Information and Pictograms

Federal and State Regulations
California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Ethyl alcohol 200 Proof (in alcoholic beverages)
California prop. 65: This product contains the following ingredients for which the State of California has found to cause birth defects which would require a warning under the statute: Ethyl alcohol 200 Proof (in alcoholic beverages)
Connecticut hazardous material survey: Ethyl alcohol 200 Proof
Illinois toxic substances disclosure to employee act: Ethyl alcohol 200 Proof
Rhode Island RTK hazardous substances: Ethyl alcohol 200 Proof
Pennsylvania RTK: Ethyl alcohol 200 Proof
Florida: Ethyl alcohol 200 Proof
Minnesota: Ethyl alcohol 200 Proof
Massachusetts RTK: Ethyl alcohol 200 Proof
Massachusetts spill list: Ethyl alcohol 200 Proof
New Jersey: Ethyl alcohol 200 Proof
Tennessee: Ethyl alcohol 200 Proof
California - Directors List of Hazardous Substances (8 CCR 339): Ethyl alcohol 200 Proof
TSCA Substances Inventory: Ethyl alcohol 200 Proof

California Proposition 65 Warnings
California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer which would require a warning under the statute: No products were found.
California prop. 65: This product contains the following ingredients for which the State of California has found to cause birth defects which would require a warning under the statute: Ethyl alcohol 200 Proof (in alcoholic beverages)

Other Regulations
EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances (EINECS no. 200-578-6).
Canada: Listed on Canadian Domestic Substance List (DSL).
China: Listed on National Inventory.
Japan: Listed on National Inventory (ENCS).
Korea: Listed on National Inventory (KECI).
Philippines: Listed on National Inventory (PICCS).
Australia: Listed on AICS.

Other Classifications
WHMIS (Canada) CLASS B-2: Flammable liquid with a flash point lower than 37.8°C (100°F).
CLASS D-2B: Material causing other toxic effects (TOXC).
S7- Keep container tightly closed.
S16- Keep away from sources of ignition - No smoking.
