Tips & Tricks to Ensure TurningPoint Quizzes Run Smoothly

1. Make sure you have entered your Device ID into your iPod Touch. When you load the TurningPoint application, you will see the following options:

   **Session to Join**
   **Join As**
   **Identify Myself As**

Under **Session to Join**, you must enter the session ID that appears on your professor’s slides while s/he administers the quiz. This ID changes for every quiz.

Under **Join As**, you should enter the email address you used to register your device at www.rwpoll.com, AS WELL AS the Device ID you got when you created your account. (If you enter this information correctly, you will see your Device ID, followed by “Expires” or “Active until” with an expiration date).

Under **Identify Myself As**, you should type in your legal name (as it appears in Blackboard) AS WELL AS the Device ID from www.rwpoll.com.

**NOTE:** The Device ID and your name should remain saved in your device after you enter them the first time, so you need only enter this information once. However, a new Session ID will have to be entered for EACH quiz.

2. You will want to disable the Auto-Lock feature in your iPod Touch, at least during quizzes. This will prevent you from becoming “locked” out of your iPod during a quiz. To do this, you
   - Click the Settings icon on your iPod.
   - Click “General.”
