

Tested POSITIVE for COVID-19

COVID-19 symptoms but no confirmed test

Prolonged exposure (i.e. close contact) with someone who is POSITIVE for COVID-19

Household contact is POSITIVE for COVID-19

Complete COVID questionnaire. Remain home until contacted and cleared.

Self-isolate for at least 10 days

Symptomatic may return when:

- 10 days (20 days for immunocompromised or severe symptoms) have passed since symptom onset AND
- symptoms are improving AND
- at least 24 hours fever free without use of antipyretic

Asymptomatic may return when:

- 10 days have passed since test date
- refer to symptomatic if symptoms develop

People who have tested positive do not need to quarantine or get tested again for 3 months as long as remain symptom-free

Self-isolate for at least 10 days

Return when:

- 10 days (20 days for immunocompromised or severe symptoms) have passed since symptom onset AND
- symptoms are improving AND
- 24 hours fever free without antipyretic

Quarantine and self-monitor for **7-10 days**; consider testing 5-7 days after exposure

May return if, at end of **10 days**:

- remained asymptomatic AND
- continue to monitor symptoms through day 14

May return at end of **7 days** if:

- remained asymptomatic AND
- test negative at least 5 days from exposure AND
- continue to monitor symptoms through day 14

**if symptoms develop, refer to gray or blue flow depending on status*

Quarantine and self-monitor for **14 days AFTER** the contact ends isolation; consider testing 7 days after exposure

May return if remain asymptomatic for entire quarantine period

**if symptoms develop, refer to gray or blue flow depending on status*

Close contact = being within 6 feet of a person diagnosed with COVID-19 for at least cumulative 15 minutes in 24-hour period and this contact was within 2 days prior to the start of symptoms or test if asymptomatic
